Salt Lake Community College | 2015

Bachelor of Music, Piano Performance
California State Univ., Northridge, CA | 2002

**Android Developer With 2+ Years Experience -
Proven Adaptability For Operating Concurrently In
Android, .NET & Web Development Environments**

EXPERIENCE

ANDROID DEVELOPER

Connect Financial Software Solutions | Murray, UT | July 2018 – present

Delivers versatile value beyond job title by performing dual developer roles:

- **Android Developer (Java)**
 - Write, troubleshoot, and optimize performance of app software utilizing correct object-oriented, SOLID principles.
 - Standardize apps across multiple brands with minimal duplication of effort.
 - Collaborate in an AGILE environment with cross-functional teams to define, design, and ship new features.
 - Interact end-to-end with RESTful APIs.
 - Produce regular documentation of new and expanded features.
- **.NET Developer (C#, Visual Basic)**
 - Support Android and iOS apps by writing and troubleshooting server code and Web API endpoints.
 - Debug n-tier websites and application servers (front and back end)
 - Navigate web service integration (SOAP, REST, JSON, XML)

ANDROID DEVELOPER – Independent Remote Contractor

Rain Bird Sprinklers | Feb 2018 – June 2018

- Remotely collaborate with app developers and spoken-language translators to implement non-English versions of Rain Bird's mobile app for programming sprinkler controller boxes.
- Accurately integrate Arabic, Chinese, and Russian string resources.
- Optimize UI layout for right-to-left orientation and different alphabet/characters.

FRONT END WEB DEVELOPER – Intern

Schawel+Coles | Sep 2017 – Dec 2017

- Implement UI theme customizations within an e-commerce software platform (Bigcommerce)
- Design and test locally prior to deployment, using the Stencil CLI framework
- Write CSS, SASS, and Handlebars.js (dynamic templating)
- Produce responsive HTML/CSS email templates, test across various email clients with Litmus
- Develop a custom Wordpress theme
